First place annual ICMA (Idaho Concrete Masonry Assoc.) design competition.

Winner Truss Joist Scholarship for portfolio competition.

Nominated for Alumni Award of Excellence.

VALUE

I relish the opportunity of helping people catch the vision of what their design project can be through sketch and 3D computer modeling. With over ten years of experience in architectural design and management I bring a passion for design excellence and enjoy the challenge of solving design problems. I'm optimistic and thrive in a professional upbeat environment, collaborating as part of a team or working autonymously. I have experience helping manage large, as well as small, architectural design projects including: conceptualization, developing presentations, generating design drawings, estimating budgets and schedules, and working with clients to keep a project on track and within budget.
